Focus of Ministry

1. Japan has 10% of the entire world's university student population and less than 0.2% are followers of Jesus. Most have never heard the Gospel even once. Our goal is to give everyone of those students the opportunity to respond to God's call to receive salvation, to repent and to live out their lives for Him.
2. To train, disciple and equip those students who surrender their lives to the service of God that they might go on to be spiritual multipliers...those who take the initiative to share the Good News whenever the Lord gives opportunity.
3. To build a spiritual movement that will go from the university campuses into the rest of Japan in the hope of seeing revival in Japan that will result in Japan being a nation that sends missionaries to the rest of Asia.

Ministry Needs:

Prayer: Especially for more labourers. We often feel greatly outnumbered as there are approximately 40,000 students to every missionary and Christian student involved in JCCC in Tokyo. Also, prayer for finances. According to the U.N., Tokyo is the most expensive city in the world to live in. The volatile exchange rate between the dollar and the yen presents a challenge to our budget. Prayer for our health. We both have sustained injuries that are a constant source of challenges. Jennifer back was hurt several years ago and doctors do not give us reason to hope for a full recovery (short of a miracle), so she lives with daily pain. Omar has osteoarthritis in his right ankle after it was injured in an automobile accident.
